

Clinical Investigator Development Program (CIDP)

Application Deadline September 30, 2017

Program Starts July 1, 2018

This is an exciting training opportunity intended for physicians interested in dedicating their careers to clinical research. CIDP assists board-eligible/board-certified translational researchers transition from a mentored position to that of an independent investigator in laboratory-based or patient-oriented research in academia, or comparable positions in government and industry. Selectees will be appointed as an “Assistant Clinical Investigator” for a three-year period at a competitive salary commensurate with subspecialty training and experience. They will be assigned dedicated space, provided with an independent budget, and given access to an extensive infrastructure including research nursing, data-management support, animal facilities, core services and advanced technologies. Potential areas of interest include: medical oncology, pediatric hematology-oncology, radiation oncology, surgical oncology, pathology, neuro-oncology and urology. Program objectives are to develop competence and skills in study design, protocol development and patient-oriented research; acquire knowledge related to the ethical and regulatory issues of conducting clinical research involving human subjects; gain direct experience with the collection and management of research data; and learn about function, development, organization and leadership of a multidisciplinary clinical research team. For more information visit our website: <http://go.usa.gov/czjrj>.

Sadhana Jackson, M.D.
Assistant Clinical Investigator
Neuro-Oncology Branch

HOW TO APPLY

Apply via the Positions at NIH Portal: <https://irp-positions.nih.gov/job/CIDP2017>

Submission is open June 1 – September 30, 2017

BENEFITS

- Flexible funding that supports innovative, high-impact bench-to-bedside research
- Access to the largest hospital in the world devoted exclusively to clinical research
- Extensive shared research resources
- Availability of a broad range of scientific and clinical expertise

HHS, NIH, and NCI are Equal Opportunity Employers
